

Instructions of FlakeBuster

Installation:

- 1 / Screw the small tube on the front of the gun,
- 2 / Screw the pressure regulator and quick coupler onto the gun using Teflon tape,
- 3 / Saw the large tube to a length suitable for the 125 or 250ml flask (the tube must be immersed in the flakes to the bottom of the flask). The tube must be sawn at an angle
- 4 / Screw the large tube into the gun.
- 5 / Push the bottle until it is firmly held in position.

Use :

- 1 / Fill the flask with flakes (at least 30% of the volume)
- 2 / Push down the bottle until it is firmly held.
- 3 / Check that the air intake hole on the top of the bottle is not obstructed
- 4 / Connect the gun to the compressed air circuit
- 5 / Adjust the air pressure from 1 to 3 bar.
- 6 / Spray powders on freshly painted / varnished surfaces

Precautions for use:

- ! Wear eye protection and respirators.
Do not direct the jets towards the eyes
