

TACTILE NAILS

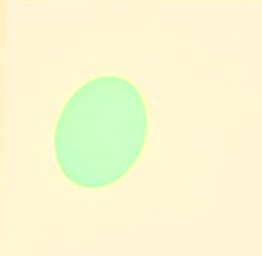

Intended to warn visually impaired pedestrians through the perception of tactile cues

We propose 3 types of CITY tactile nails

>> CT-1011S - Stainless steel nail, 6 anti-slip slots (35*25*5mm)*15mm

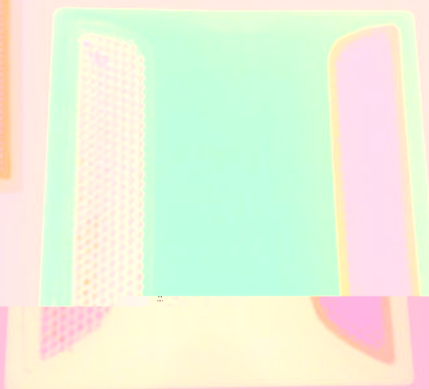

>> CT-1013S - Stainless steel nail, 10 anti-slip slots (35*25*5mm)*15mm

>> CT-1030L - High Phosphorescence photoluminescent nail (35*25*5mm)*12mm

ROAD STUDS

ROUND FLOOR ADHESIVE

FRECCE ALLUMINIO

High phosphorescence reflective road studs for use in a tactile floor for a photo-luminescent guidance system.
30mm long
Made of a 0.7mm aluminium. Weight: 150g
Photoluminescence class: Class E
